

Paul Gerber Zürich

MODEL 41

Paul Gerber has taken the opportunity to integrate two spring barrels in his new automatic **manufacture movement** «Caliber 41» achieving 100 hours of power reserve.

Ref. 416, case in **stainless steel** Ø 42mm, available with black or white dial applied indexes.

Inspired by the original Retro Twin with the famous twin rotor system, the Caliber 41 is fitted with **three gold rotors**. Each rotor is individually assembled to the movement using custom-made ball bearings. The Caliber 41 also incorporates a large quick set date system. The date can be adjusted either forwards or backwards.
